

Make a Plan for Mobile Cleaning and Detailing

Toxic chemicals from mobile washing and detailing can cause runoff that pollutes our roadways and storm drains, which lead to the Mojave River Watershed.

Follow these stormwater-savvy steps to keep our local waterways pollution-free:

- 1 Clear the area of debris, then throw it away in a trash can
- 2 Guard nearby storm drains with sandbags or coverings
- 3 Use biodegradable products
- 4 Use a water shutoff nozzle on the hose to prevent excess runoff
- 5 Wash and detail vehicles on a lawn instead of a driveway to reduce runoff
- 6 Invest in a portable vacuum recovery system to safely contain and dispose of water runoff
- 7 Avoid washing the undercarriage to prevent oil, metal and antifreeze from entering runoff

Dispose of all toxic materials at a Household Hazardous Waste Collection Center.

TAKE THE PLEDGE

The Mojave River Watershed's groundwater is the main source of water for many High Desert residents, plants and wildlife. It's up to us to keep it clean.

Household Hazardous Waste Collection Centers

- ◆ Town of Apple Valley Household Hazardous Waste Facility
13450 Nomwaket Road
- ◆ City of Hesperia Household Hazardous Waste Facility
17443 Lemon Street
- ◆ City of Victorville Household Hazardous Waste Collection Center
Located on Loves Lane behind the San Bernardino County Fairgrounds
